

# HNS Hit Notification System

## Person & Vehicle Tracking

REJIS

HNS is a system containing subject or vehicle data entered by participating agencies to generate a notice when predetermined transactions involving that individual are processed. HNS operates on the concept of an owner and a trigger. The owner is the agency that enters the record into HNS. The trigger is the agency that uses one of the predetermined transactions, such as entry of an arrest, which generates a 'hit' on the information in HNS. This process is automatic. Before data can be entered the owner and reason (person of interest, vehicle of interest, employee, probationer, diversion program, neighborhood order of protection, etc) for entry in HNS must be defined.

The REJIS Commission is a local government agency created to "serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies." REJIS' primary focus is to provide record management services to law enforcement, courts and corrections agencies at the local, state and federal levels. This includes interfaces to the Missouri State Highway Patrol MULES system; Missouri Department of Revenue (DOR); the National Crime Information Center (NCIC); the Kansas KCJIS and KDOR; and Nlets. REJIS was founded in 1975 under a cooperative agreement between St. Louis County and the City of St. Louis. Primarily concentrated in the metropolitan St. Louis and Kansas City areas, we service criminal justice agencies in Missouri, Kansas and Illinois.

REJIS services include:

- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and help desk support

REJIS has approximately 140 employees located at three sites. Most of our staff and equipment are based at the REJIS building, in the Central West End of St. Louis.

For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).

## Benefits

- Both the owner and trigger can be notified when hits are made, thus alerting the trigger to the interest of the owner agency in this individual or vehicle so they can act accordingly
- HNS provides a constant monitoring system to alert owners of some involvement of the subject or vehicle within the criminal justice system
- Entry can be automatic, triggered by actions in other REJIS systems
- Entry can be through manual transactions, one at a time
- Entry can be through a batch load
- Follow up action requested of triggers and owners can be entered on each record
- The owner can receive notices of hits on a real-time basis or through an online inquiry
- There are a number of entry/update and inquiry transactions from which to select as triggers.

## Access

- Formal letter of request for entry authorization is required
- Reason for entry must be specified
- Contact information for the person responsible for the program within the requesting use must be provided
- Letter can be faxed or mailed to REJIS, attention Client Services or email to [CLIENT@rejis.org](mailto:CLIENT@rejis.org)
