Information Security Services – ISAT

REJIS

Educate! Before a Phishing Scam Impacts Your Organization!

Even the most sophisticated, updated, and expensive internal systems still rely on people who use their computer. All efforts to bolster a secure system can be defeated by one click within an email. It's called Phishing. Those who deploy phishing attacks are very creative. Have all of your efforts to educate your team worked?   How do you improve your teams understanding of phishing and cyber security?   Implementation of the Information and Security Awareness and Training offers easy, quick, and informative tests and lessons to carefully educate employees and contractors.

The REJIS Commission is a government partner created to "serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies." REJIS provides CJIS secure WAN/LAN connection services, data record management, data center collocation, and record management applications to law enforcement, prosecutors, and corrections agencies at the local, state and federal levels.

REJIS services include:

- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and help desk support
- Information Security & Advisory Services

REJIS has approximately 140 employees located at three sites. Most of the staff and equipment are based at the REJIS building, in the Central West End of St. Louis.

For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).

Information Security Awareness & Training (ISAT)

Education Service:

- Protect your data by strengthening your weakest link: The Human Factor
- Build security awareness for your employees and contractors
- Meet Compliance and Cyber Insurance requirements for Levels I-V Trainings
- Training for IT staff on hardening your servers, workstations and applications
- Remote Service Delivery

Typical objectives of ISAT engagements include:

- Increase workforce knowledge: how to identify and defend against phishing and social engineering attacks
- Educate you team on data protection best practices
- Minimize risk of rapidly growing threats like (BEC) Business Email Compromise

ISAT Engagement Packages:

- Licensing of Training Platform Only
- Licensing + Setup of Training Platform
- Licensing + Setup + 1 Simulated Phishing Campaign & 1 Employee Training Module/Month
- One Additional Phishing Campaign or Employee Training Module

Terms & Definitions

Security Awareness & Training
Consists of simulated phishing email campaigns to determine risks to your email users. Includes video and game style training modules to teach your users what to watch out for and how to perform their work duties in a more secure manner. These trainings are often a requirement for compliance obligations and also lower the cost of cyber insurance for companies that offer ongoing training to their employees.

Social Engineering
Social engineering is "people hacking" and involves maliciously exploiting the trusting nature of human beings to obtain information that can be used for personal gain. It can be done via email, text, phone or face to face conversations.
