PAMS

Prosecuting Attorney Management System

REJIS

PAMS was created as a stand-alone prosecutorial case management system to provide a manageable work-flow for municipal prosecutors and prosecutor assistants. This system has the mechanism in place to satisfy the division of duty requirements as set by the state. PAMS gives the prosecutor an automated issue and refusal process while still retaining the history of the original citation, summons and parking violations. PAMS has the capability to interface with other judicial and law enforcement software for more accurate entries and reporting options.

The REJIS Commission is a local government agency created to "serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies." REJIS' primary focus is to provide record management services to law enforcement, courts and corrections agencies at the local, state and federal levels. This includes interfaces to the Missouri State Highway Patrol MULES system; Missouri Department of Revenue (DOR); the National Crime Information Center (NCIC); the Kansas KCJIS and KDOR; and Nlets networks. REJIS was founded in 1974 under a cooperative agreement between St. Louis County and the City of St. Louis. Primarily concentrated in the metropolitan St. Louis and Kansas City areas, we service criminal justice agencies in Missouri, Kansas and Illinois.

REJIS services include:
- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and help desk support

REJIS has approximately 140 employees located at three sites. Most of our staff and equipment are based at the REJIS building, in the Central West End of St. Louis.

For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).

Benefits and Features

- Approved tickets flow seamlessly from REJIS Mobile Ticketing System to PAMS
- Tickets and informations can be manually entered into PAMS
- Interface option to OSCA Show-Me Courts System
- Capability in place for interface with Missouri Highway Patrol (MSHP) for fingerprint reporting
