

REJIS Backup Solution

Enterprise-Class Backup and Disaster Recovery

REJIS

REJIS services include:

- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and ROC Support
- Information Security Assessment and Advisory

REJIS has approximately 140 employees located at three sites. Most of our staff and equipment are based at the REJIS building, in the Central West End of St. Louis.

For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Operational Center at (314-535-9497 or 1-888-923-7255).

With REJIS Unified Backup, you can rest assured your backups are safe and available when you need them the most.

Enterprise-Class Backup and Disaster Recovery

REJIS Unified Backup brings together the world's best backup, ransomware protection, cloud-based storage and Business Continuity and Disaster Recovery (BCDR) services in a powerful, all-in-one appliance-based platform that provides high-quality protection while minimizing service delivery cost.

BCDR that works natively with BCDR

Be a hero! Reduce downtime with instant recovery, ransomware detection, and automated disaster recovery testing. REJIS Backup Solution is an appliance-based DRaaS, allowing you to leverage your existing investment in endpoint management to catapult your capability and meet the backup demands of the business, all while using a workflow that is familiar. Gives you confidence that your data is protected while keeping the granularity needed to resolve specific issues.

Disaster-Proof Your Agency

When disaster strikes, don't let unplanned downtime take down your business systems and data. REJIS Backup Solution has your back, 24/7/365, empowering you to:

Intelligent Alerts Without the Noise

BackupIQ uses artificial intelligence to surface the most important issues, so that your technicians are always working on the right issues as efficiently as possible.

Stay Protected from Ransomware Attacks

Kaseya Unified Backup inspects every file during each backup for ransomware infections to ensure "clean" instant recoveries are always at your fingertips.

Automated Testing for Guaranteed Recovery

100% automated testing ensures the most comprehensive recovery assurance testing programs are always done, giving you real confidence that your backups are truly captured and ready at a moment's notice.

"By regularly backing up data files and securing those backups offline, properly educating employees, investing in state-of-the-art security and antivirus software and purchasing a comprehensive cyber insurance policy, businesses can be better prepared and protected, no matter the threat."

Anthony Dolce, VP & Cyber Lead, Chubb North America
