

Information Security Services - vCISO

Virtual Chief Information Security Officer - vCISO

REJIS

The threat landscape is constantly changing and becoming more complex at a time when information security resources for government and law enforcement agencies are challenged to keep up with the growing risks. The REJIS Information Security Advisory Service was created to provide on-site and remote Information Security resources to fit the security and compliance needs of your agency. Our highly trained, certified and experienced team is available to protect, support and advise your agency to threats, vulnerabilities and best practices for securing your data, networks and infrastructure.

The REJIS Commission is a government partner created to "serve the public interest through delivering quality, cost-effective technology services to the justice community and to government and quasi-government agencies." REJIS provides CJIS secure WAN/LAN connection services, data record management, data center collocation, and record management applications to law enforcement, prosecutors, and corrections agencies at the local, state and federal levels.

REJIS services include:

- Development of custom applications
- Installation and support of custom and commercially available software
- Custom interfaces
- IT Support Service
- Data center outsourcing
- Network, training and help desk support
- Information Security & Advisory Services

REJIS has approximately 140 employees located at three sites. Most of the staff and equipment are based at the REJIS building, in the Central West End of St. Louis.

For additional information on REJIS services, contact your REJIS Client Services Representative or the REJIS Help Desk (314-535-9497 or 1-888-923-7255).

Virtual Chief Information Security Officer Service:

- Information Security Advisory when you need it: Developed for agencies that do not have the budget for a full time CISO on staff but have need for CISO level Information Security Advisory
- Remote WEBex and Conference Call availability to fit your budget and service level needs
- Gain immediate and ongoing access to executive and expert level information security talent to align your IT security efforts and business goals
- Receive unbiased assessment of current information security posture and program

Typical Objectives of vCISO Engagements Include:

- Information security leadership and guidance
- Information security program development
- Steering committee leadership or participation
- Security compliance management
- Security policy, process, and procedure development
- Incident response planning
- Security training and awareness
- Security assessment
- Internal audit
- Penetration testing
- Social engineering
- Vulnerability assessments
- Risk assessment
- Remediation guidance

"The shared CISO opportunity with REJIS has been a good solution for Bi-State Information Technology. It has provided a local, part-time resource to work directly with my team on information security initiatives. Having the CISO has helped the team focus on security improvement planning and road mapping. We are making positive progress on items that have not received the attention they deserve. This is an effective solution for anyone who can't afford a full time CISO."

Kerry Kinkade - VP-CIO, Bi-State Development

IT security has become a necessary and critical component for all government entities and the shared CISO service between REJIS, MSD and Bi-State is a creative and collaborative solution for our organizations to secure this valuable resource. We have found that this partnership provides more value than just our share of the time. So many issues are common between organizations that we all benefit from both individualized and shared efforts. We are very pleased with our arrangement.

Jonathon Sprague - Director of IT (CIO), MSD
